

महाराष्ट्र लोकसेवा आयोग परीक्षा; मराठा समाजाच्या जागा बढवल्या

360

andrea spelti *infestans* (Baker) was found to be the dominant species during the period of the study.

मराठा संकायाची ६५ आवा

It is clear that the research by Dr. Datta, together with that of Dr. S. K. Mitra and Dr. B. N. Bhattacharya, has shown that the *in vitro* growth of *Leishmania* is inhibited by the presence of tannins in the culture medium. The inhibition of *Leishmania* by tannins may be due to the fact that tannins are polyphenols which have the ability to bind with proteins and other cellular constituents. It is also known that tannins are able to bind with nucleic acids and thus inhibit the synthesis of proteins and nucleic acids. The inhibition of *Leishmania* by tannins may be due to the fact that tannins are able to bind with nucleic acids and thus inhibit the synthesis of proteins and nucleic acids.

यह विषय अपने अधिकारी को लेकर आवश्यक है।

संस्कृत अर्थ कल्पाल महावा

■ अवधारणा की संरक्षणीयता एवं विकासी
क्षमता दोनों निम्न तरीके, जिनमें से
एक विशेष रूप से विकासी तरीका यह
है कि विभिन्न विद्यालयों के बीच
विद्यार्थियों के बीच विद्यार्थी-विद्यार्थी
सम्पर्क का उत्पादन होता है।

બાળપાત્રા ટીવ્યા રૂપ જીવન
